

News from the Helotes Heritage Association

Dear Readers,

The Helotes Parks and Open Space Committee is actively seeking input and participation from the community on two important projects the Parks Committee is currently engaged (1) the creation of Parrigin Playground, the first public playground for Helotes children, and (2) identification and evaluation of potential sites for the Sen. Frank Madla Memorial Park, the first multi-use park for our community.

We plan to initiate preliminary land surveying and site preparation of the Parrigin Playground Playground this fall. Final playground design is ongoing, but site preparation can be undertaken while plans are finalized. We will be working closely with Boy Scouts and community groups to perform these preliminary tasks.

Secondly, the Parks Committee is also seeking public input regarding potential sites for the Sen. Frank Madla Memorial Park. As you may recall, the Helotes City Council has charged the Parks Committee with identifying and evaluating potential sites for the Memorial Park.

The public is invited to partake and contribute to both projects to help insure that the parks reflect their wishes. The Parks Committee meets at 7 pm of the first Thursday of every month at the City Hall. Please attend to provide your input regarding these or any other parks project. In addition, the Parks Committee is available to make a presentation on Helotes parks and these ongoing efforts. Please contact the Parks Committee through the City Secretary if you have any suggestions or questions.

Sincerely,
Ron Green, President
Helotes Heritage Association
