

News from the Helotes Heritage Association

Dear Readers,

There will be an opportunity to hear two experts describe the Hill Country geology and hydrology at the next Hill Country Planning Association (HCPA) Monthly Meeting. This will be:

Sunday January 20th
3-5PM Scenic Loop Playground Clubhouse

The HCPA will continue their Educational Series with presentations by Dr. Bill Ward and Dr. Feather Wilson and their most timely and relevant topics. This will be an excellent opportunity to learn about our environment from two of the recognized experts on the geology and water resources of our region.

Dr. Bill Ward, University of New Orleans: Prof Emeritus of Geology
Topics will include: NW Bexar County area geologic formations and time line, formation of karst geology, groundwater and aquifers.

Dr. Feathergate Wilson, hydrogeologist and consultant
Topics will include: age of groundwater, recharge, water amounts & quality from various formations, specifics about the Trinity & Edwards aquifers, background of water districts.

Question and Answer period - to include how we can help, Desired Future Conditions, SAWS, development, etc.

If there is time for at the end of the meeting, HCPA will briefly cover issues, problems, announcements from other groups or individuals.

Please contact me if you have questions about the meeting or how to find the meeting location.

Sincerely,
Ron Green, President
Helotes Heritage Association
